UNITED STATES DEPARTMENT OF AGRICULTURE

WASHINGTON, D. C.

1. The first part of the report is a general statement of the purpose and scope of the investigation. It is followed by a description of the methods used in the study. The results of the investigation are then presented in a series of tables and figures. The final part of the report is a summary of the findings and a discussion of their significance.

2. The second part of the report is a detailed description of the methods used in the study. It includes a description of the experimental design, the subjects used, and the procedures followed. This part is followed by a description of the data collection and analysis methods.

3. The third part of the report is a presentation of the results of the investigation. It includes a series of tables and figures that show the data collected and the results of the analysis. This part is followed by a summary of the findings and a discussion of their significance.

4. The fourth part of the report is a summary of the findings and a discussion of their significance. It includes a summary of the results of the investigation and a discussion of the implications of the findings. This part is followed by a conclusion and a list of references.
